

I am not currently protected by the Indiana Telephone Privacy Law until Jan of 2003. I regret not signing up sooner. Please do not abolish this Law, it will be a great relief when my name is added. I receive approximately 6 calls per day and when I say I'm not interested and hang up the phone rings immediately and it is someone else from the same company. Some of the callers are rude and chastise you when you state you are not interested. I don't feel it is right to allow people to harass you in your own home. I pay my phone bill so I can call family and friends and whom ever I choose, not to be harassed by unsolicited callers calling sometimes at 10:00pm on a Sunday night to sell me something, and then being rude when you point out the day and time to them. Please help me out, and others like me who are upset that they can't get peace from people they don't do business with.
